

Test Case Document

Project: Admission Management System

Total Test Cases: 26

Prepared for: Manual functional testing across authentication, course management, admissions, uploads, roles, reports, and security modules.

ID	Module	Scenario	Precondition	Steps	Expected Result	Actual Result	Status	Priority
TC-01	Authentication	Register with valid data	App running, DB connected	1. Go to register page 2. Enter valid name, email, password, phone 3. Submit	User account is created; success message shown; user redirected to login	Account successfully created; success message displayed; user redirected to login page as expected.	Pass	High
TC-02	Authentication	Register with existing email	Account with this email already exists	1. Go to register page 2. Enter an already-registered email 3. Submit	Registration fails with "Email already exists" error; no duplicate user created	Registration failed with "Email already exists" error message displayed; no duplicate account was created.	Pass	High
TC-03	Authentication	Login with valid credentials	Registered account exists (e.g. student@gmail.com)	1. Go to login page 2. Enter correct email and password 3. Submit	User is authenticated; JWT token returned; user redirected to their dashboard	User logged in successfully with valid credentials; JWT token generated; user redirected to dashboard as expected.	Pass	High
TC-04	Authentication	Login with incorrect password	Account exists	1. Enter valid email 2. Enter wrong password 3. Submit	Login is rejected with "Invalid credentials" error; no token issued	Login failed with "Invalid email or password" error message displayed; user was not authenticated.	Pass	High
TC-05	Authentication	Access protected route without token	User is not logged in	1. Call a protected API (e.g. GET /api/applications/my) 2. Do not attach an Authorization header	Request is rejected with 401 Unauthorized	Request was rejected with response: {"success": false, "message": "Not authorized, no token"} — no data was returned without authentication.	Pass	High
TC-06	Course Management	View all available courses	At least one course exists in DB	1. Navigate to Courses page (as student or guest)	List of all active courses is displayed with name, duration, seats, and fee	Course names are displayed in the dropdown for selection while applying; full course details (duration, seats, fee) are not shown here — only visible in Admin panel.	Pass	Medium

ID	Module	Scenario	Precondition	Steps	Expected Result	Actual Result	Status	Priority
TC-07	Course Management	Admin adds a new course	Logged in as superadmin/officer	- Go to Admin > Courses - Fill course name, duration, seats, fee, eligibility - Save	New course is created and appears in the course list	Course was added successfully; confirmation alert displayed: "Course added successfully!"	Pass	High
TC-08	Course Management	Student attempts to add a course	Logged in as student	Attempt to call POST /api/courses directly	Request is rejected with 403 Forbidden (role check blocks non-admin users)	Request was rejected with response: {"success": false, "message": "Role 'student' is not authorized to access this resource"} — course was not created.	Pass	High
TC-09	Course Management	Admin updates an existing course	Course already exists	- Open course in Admin panel - Change fee or seats - Save	Course details are updated and reflected on the courses list	Edit Course page loads but only displays a placeholder text "Edit Course page is working." — no actual form/fields are present to update course details (fee, seats, duration, etc.). The update functionality is not implemented.	Fail — Edit Course not implemented	Medium
TC-10	Course Management	Admin deletes a course	Course exists with no active applications	- Select course in Admin panel - Click Delete - Confirm	Course is removed from the database and no longer visible to students	Course was deleted successfully from the Admin panel; course no longer appears in the courses list.	Pass	Medium
TC-11	Admission / Application	Student submits a new application	Student logged in; course exists	- Go to Apply page - Fill personal & academic info - Select course - Submit	Application is created with a unique applicationId and status "pending"	Application submitted successfully; success message "Application submitted successfully" was displayed.	Pass	High
TC-12	Admission / Application	Submit application with missing required field	Student is logged in	- Leave a required field empty (e.g. father's name) - Submit	Form validation error is shown; application is not submitted	Submission failed with error: "Application validation failed: personalInfo.fatherName: Path personalInfo.fatherName is required." Application was not submitted.	Pass - Error message is technical/backend-style rather than user-friendly (e.g. could instead say "Father's Name is required").	High

ID	Module	Scenario	Precondition	Steps	Expected Result	Actual Result	Status	Priority
TC-13	Admission / Application	Submit application with invalid percentage	Student is logged in	1. Enter percentage value above 100 or below 0 2. Submit	Validation error is returned; application is rejected at input stage	Input validation blocked invalid values: entering "-100" showed "Value must be greater than or equal to 0", and entering "103" showed "Value must be less than or equal to 100." Form did not allow submission with an invalid percentage.	Pass	Medium
TC-14	Admission / Application	Student views their own applications	Student has submitted at least one application	1. Log in as student 2. Go to "My Applications"	Only that student's applications are listed, with correct current status	Only the logged-in student's own applications are displayed in "My Applications"; no other students' applications are visible.	Pass	High
TC-15	Admission / Application	Admin views all applications	Logged in as officer/superadmin	1. Go to Admin > Applications	All submitted applications from all students are visible in a list/table	Only 10 (the most recent) application is displayed in the Admin > Applications list; other students' applications are not shown, even though multiple applications exist in the database.	Fail — only 10 application shown instead of all	High
TC-16	Admission / Application	Admin approves an application	Application with status "pending" exists	1. Open application 2. Click Approve 3. Add remark (optional) 4. Confirm	Status changes to "approved"; status history entry recorded with timestamp	Application status changed to "Approved" after clicking Approve; status update was reflected correctly.	Pass	High
TC-17	Admission / Application	Officer rejects an application	Application with status "pending" exists	1. Open application 2. Click Reject 3. Add remark 4. Confirm	Status changes to "rejected"; remark is saved in status history	Application was rejected successfully and status changed to "Rejected." However, no option to add a remark/reason was available during rejection — only Approve/Reject buttons exist.	Pass - Remark/reason field is not implemented in the reject flow. Status history may lack context on why an application was rejected — recommended as a future enhancement.	High

ID	Module	Scenario	Precondition	Steps	Expected Result	Actual Result	Status	Priority
TC-18	Admission / Application	Student downloads application as PDF	Student has an existing application	1. Go to My Applications 2. Click "Download PDF"	A correctly formatted PDF containing application details is downloaded	PDF was downloaded successfully containing the application details.	Pass	Medium
TC-19	Document Upload	Upload a valid document (PDF/image)	Student is filling out an application	1. Click Upload Document 2. Select a valid PDF or image file 3. Submit	File uploads successfully and is linked to the application	Document was uploaded successfully and is correctly linked to the application; file opens properly when accessed from the application.	Pass	High
TC-20	Document Upload	Upload a file exceeding size limit	Multi size limit is configured	1. Attempt to upload a file larger than the allowed limit	Upload is rejected with a clear file-size error message	Upload was rejected with error message "File too large" when the file exceeded the 5MB size limit.	Pass	Medium
TC-21	Document Upload	Upload an unsupported file type	Only specific file types allowed (pdf, jpg, png)	1. Attempt to upload a .exe or .zip file	Upload is rejected with an "unsupported file type" error	The file picker dialog only displays allowed file types (e.g. PDF, JPG, PNG) — unsupported file types like .zip do not appear as selectable options, preventing invalid uploads at the file-selection stage itself.	Pass	Medium
TC-22	User & Role Management	Superadmin views all registered users	Logged in as superadmin	1. Go to Admin > Users	Full list of users is displayed with name, email, and role	All registered users are displayed in the Admin > Users panel with their name, email, and role correctly shown.	Pass	Medium
TC-23	User & Role Management	Superadmin deactivates a user account	An active user account exists	1. Open user profile in Admin panel 2. Toggle "Active" off 3. Save	User's isActive flag becomes false; user can no longer log in	Toggling "Active" off successfully changed the user's status to inactive. Login attempt with that account was blocked with message "Login Failed — Your account has been deactivated. Contact admin." — deactivation is correctly enforced.	Pass	High
TC-24	Admission / Application	Student attempts to apply twice for the same course	Student has already submitted	1. Log in as the same student	System should either block the duplicate application with an	A second application for the same course was submitted successfully without any warning	Fail	Medium

ID	Module	Scenario	Precondition	Steps	Expected Result	Actual Result	Status	Priority
			an application for a course)	2. Go to Apply page 3. Select the same course again 4. Submit	error (e.g. "You have already applied for this course") or clearly allow multiple applications if that's an intended design choice	or block. No duplicate-check mechanism exists — the student now has multiple applications for the same course.		
TC-25	User & Role Management	Student updates their own profile	Student is logged in	1. Go to Profile 2. Update phone number 3. Save	Profile is updated successfully and reflected on next login	Student's phone number was updated successfully in the Profile section.	Pass	Low
TC-26	Dashboard & Reports	Admin dashboard shows correct statistics	Applications and courses exist with varied statuses	1. Log in as superadmin/officer 2. Open Dashboard	Total applications, pending count, approved count, and course count match DB data	Dashboard statistics (total applications, pending count, approved count, total courses) match the actual data correctly.	Pass	Medium
